BITCOIN

THE FUTURE OF
MONEY

Bitcoin is an innovative payment network and a new kind of money. Bitcoin is also an extremely rare and valuable asset you can own.

BITCOIN

If you want to participate in the greatest transfer of wealth in history – you want to own some Bitcoin

- Bitcoin uses peer-to-peer technology to operate with no central authority or banks
- Managing transactions and the issuing of bitcoins is carried out collectively by the network
- Bitcoin is open-source – its design is public
- Nobody owns or controls bitcoin and everyone can participate
- Bitcoin is 100% secure and has been used successfully since 2008
- Bitcoin allows for fast peer-to-peer payments around the world
- Bitcoin is also a store of value – it has a value as an asset in the global marketplace
- Bitcoin has produced a record 8,990,000 % gains – beating gold and all other assets
- Bitcoin is scarce – there can only ever be 21 million bitcoins – making them extremely valuable

ALTCOINS

ALTERNATIVES TO BITCOIN

“Altcoin” is a combination of the two words “alt” and “coin” and includes all alternatives to Bitcoin.

- The basic technology framework for Bitcoin and altcoins is similar
- They share code and function as peer-to-peer systems processing large amounts of transactions
- Some altcoins aspire to be the next Bitcoin as an inexpensive method for digital transactions
- Some altcoins are also software platforms that allow developers to build unique business applications
- Top altcoins are: Ethereum, Cardano, Binance Coin, Litecoin, Monero, and many more
- Altcoins represent 40% of the entire cryptocurrency market, with over 9000 and counting
- Investors can buy a variety of altcoins that perform different functions in the crypto economy
- Like Bitcoin, some altcoins are highly valuable assets that can dramatically go up in value

ALTCOINS

If you want to participate in the future of global money - you want to own some altcoins

THE PROBLEM

Less than 1% of the world's population owns bitcoin or altcoins.

Cryptocurrency is viewed by many as an uncertain new technology that appears to be either too risky or too complicated to understand

**BITCOIN & CRYPTO ARE ONLY
RISKY FOR THOSE WHO DON'T
UNDERSTAND THE TECHNOLOGY**

Most of the world's population is missing out on the greatest transfer of wealth opportunity in history – simply because they don't understand how powerful Bitcoin and cryptocurrency truly are.

SOLUTION

Coin Empire is the first company to help you easily introduce Bitcoin and altcoins to others. We enable you to transfer your personal cryptocurrency onto your own private Cold Storage Coin wallets and then showcase your physical coins to friends by sharing them or scanning them into our mobile app for display – instantly overcoming the technology barrier that keeps many people away.

THE PRODUCT

Coin Empire's cold storage coins are the first private wallets to store Bitcoin and altcoin money that come in the form of investment-grade precious metal collectible gold, silver, and copper coins.

INDUSTRY LEADING

Featuring German Engineering

TAMPER-EVIDENT

Completely Secure For Life

EASY ACCESS

Access Your Privately Stored Cryptocurrency Instantly

LASER-ETCHED

Deeply Engraved Private Key & QR Code

A cryptocurrency wallet is a secure digital wallet that only exists electronically – it is used to store, send, and receive digital currencies like Bitcoin.

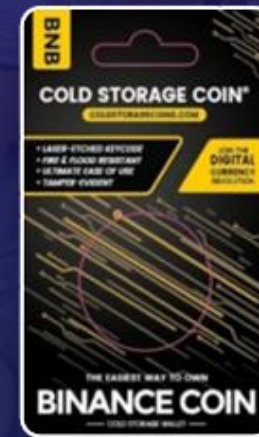

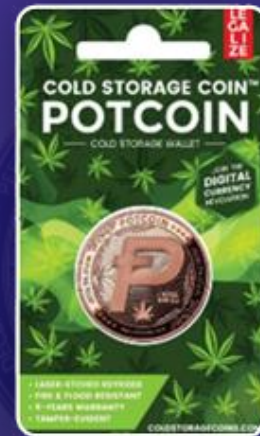

A FIRST CLASS PRODUCT WITH NO COMPETITION

Coin Empire Cold Storage Coins are professionally minted precious metal coins using state-of-the-art technology to laser-etch a unique Bitcoin or altcoin digital wallet address onto the back of every coin

COLD STORAGE COINS

Beautiful precious metal collectible coins minted with cryptocurrency branded logos

100% ORIGINAL – NO COMPETITION

Coin Empire Cold Storage Coins are a unique, valuable and high-quality product with no competition.

UNIQUE VALUE

Crafted from 999 fine copper, silver and gold, Coin Empire Cold Storage Coins have three values - the value of the wallet embedded on the coin, the value of the metal itself, and the value of the collectible coin

UNIQUE SECURITY

The wallet address and private key are both permanently marked on the surface of the coin, removing forgetfulness and human error from the equation. The private key is secured beneath a state-of-the-art, tamper-evident holographic sticker – completely unhackable and tamper-resistant

UNIQUE QUALITY

Copper, silver & gold won't rust. These precious metals are resistant to corrosion and can survive floods, household fires and even up to 30% defacing of the laser-etched QR code before becoming unreadable

UNIQUE SAFETY

Eliminate the risks associated with storing your cryptocurrency on exchanges or in "hot" online wallets by instead storing your digital currencies offline. Keep your Coin Empire Cold Storage Coin in a safe or bury it in the backyard for added protection. If you hold it, you own it.

AN INDUSTRY FIRST

Using state-of-the-art German-engineering, Cold Storage Coins are unlike anything you have ever seen before. You need to hold one in the palm of your hands!

ICONIC

First minted in 2012, our ORIGINAL Bitcoin is recognized and accepted globally!

FLAWLESS

Exceeds the quality specs established by the American Open Currency Standard [AOCS]

AUTHENTIC

BUYER BEWARE! Our pure copper coin won't rust or corrode. Don't be fooled by fakes.

INDUSTRY LEADING

Featuring German engineering, the KURZ® Trustseal® hologram uses 12 of the world's best security protocols, including 25-micron Nanotext.

TAMPER-EVIDENT

A random destructive pattern ensures foul play is quickly recognized.

EASY CLEAN-UP

Use ordinary household solvents like WD-40® to remove excess security adhesive.

LASER-ETCHED

Deeply engraved is your private key & QR code. One scan is all you need to cash out quick!

EASY TO USE

STATE-OF-THE-ART MOBILE APP TECHNOLOGY

You can use our mobile app to check your coin balances.

Our app makes it easy keep track of all your Cold Storage Coins in one place, with up-to-the-minute balance information, available for both Android & iOS devices.

You can scan your QR Code to link your coin wallet to any hot wallet of your choice to access and use instantly. **NOTE: all coin wallets come to you empty – you have the option to transfer your own personal crypto to load them.**

ONE QUICK SCAN TO GET STARTED

- Your coin arrives to you without any Bitcoin or crypto on it. Link a hot wallet app & start a transfer using the QR read feature
- Scan the public key found on the reverse of your Cold Storage Coin and match the Coin ID to the public key to confirm you scanned the right address. Enter any amount of crypto – large or small – and authorize the transfer. That's it - you did it!
- Your cryptocurrency is now in deep cold storage, safely stored offline away from hackers and other types of digital risk

THE OPPORTUNITY

Coin Empire pays you daily and weekly to share our amazing Cold Storage Coins socially with others.
